

BIG CHIPPEWA LAKE ASSOCIATION

Oct. 15, 2001

Dear Lake Association Member,

Your Task Force has been busy researching the various options for a Sanitary Sewer System which would best serve the Homeowners in our district.

We have prepared an Information Paper which explains some of the findings we have made. We believe this will be helpful in your understanding of some of the options that we have in making our decision of what we should do in the future.

We are continuing to explore these options and we are also working with other potential districts to determine if their would be economies in joining with these people for a more central system.

Plan to attend the Informational meeting scheduled for 10:30 A.M. October 20, 2001 at the Brandon Township Hall and also the Public Hearing on October 26th.

Sincerely,

Richard L. Mohagen, President
